GUJARAT TECHNOLOGICAL UNIVERSITY

BE - SEMESTER-V (NEW) - EXAMINATION - SUMMER 2017

Subject Code: 2150708 Date: 03/05/2017

Subject Name: System Programming

Time: 02:30 PM to 05:00 PM **Total Marks: 70**

Instructions:

- 1. Attempt all questions.
- 2. Make suitable assumptions wherever necessary.
- 3. Figures to the right indicate full marks.

MARKS

0.1 **Short Questions**

14

- 1 Define: Language Processor.
- phase performs type checking task. 2 [a] Lexical Analysis [b] Syntax Analysis [c] Semantic Analysis
- 3 Define: Parse tree.
- 4 State True/False: Code optimization phase is optional phase of compiler.
- Which phase of compiler will generate error if semicolon is missing in a c 5 program?
- Define: intermediate code. 6
- Define: Pattern. 7
- 8 State True/False: Top Down parsers can never work with left recursive grammar.
- Define: symbol Table. 9
- Define: Semantic Gap. 10
- Define: Backpatching. 11
- 12 State True/False: "Single pass assemblers cannot handle forward references."
- Define: Macro Assembler. 13
- **14** State True/False: Symbol table is used to store mnemonics and opcodes.
- **Q.2** (a) Eliminate left recursion from following grammar.

03

- $S \rightarrow A$
- $A \rightarrow Ad \mid Ae \mid aB \mid aC$
- $B \rightarrow bBC \mid f$
- $C \rightarrow g$
- **(b)** Construct LL(1) parsing table for following grammar.

04

- $S \rightarrow iCtSeS \mid iCtS \mid a$
- $C \rightarrow b$
- Construct an optimized DFA: (c)

07

0*1*(0/1)#

OR

| | (c) | Show that following regular expressions are equivalent by constructing optimized DFA. | | |
|------------|--------------|--|-----|--|
| | | (0/1)* | | |
| | | (0*/1*)* | | |
| Q.3 | (a) | What is Peephole optimization? Explain any two optimization transformations in detail. | 03 | |
| | (b) | Define and explain different intermediate code representations. | 04 | |
| | (c) | What is main task of semantic analysis phase? Explain inherited and | | |
| | (0) | synthesized attributes in detail with example. | 07 | |
| | | OR | | |
| Q.3 | (a) | Define: L-Attributed definition in detail. | 03 | |
| • | (b) | | | |
| | () | stack allocation in detail. | | |
| | (c) | Generate Quadruple, Triple, Indirect Triple for following expression: | 07 | |
| | ` ' | ans= $a+b*c/2.0$ | | |
| Q.4 | (a) | What is program relocation? How relocation is performed by linker? | | |
| _ | (b) | Write and explain the algorithm for macro expansion. | | |
| | (c) | Explain in brief design of a Two Pass Assembler. | 07 | |
| | | OR | | |
| Q.4 | (a) | What is overlay? Explain the execution of an overlay structure program. | 03 | |
| | (b) | Explain in brief self relocating programs. | | |
| | (c) | Explain in detail any two advanced assembler directives. | 07 | |
| 0.5 | (a) | Explain Types of anomany in detail | 02 | |
| Q.5 | (a) | Explain Types of grammar in detail. | 03 | |
| | (b) | Compare and Contrast macro preprocessor and macro assembler. | 04 | |
| | (c) | Explain in brief design the linker. | 07 | |
| 0.5 | (a) | OR | 0.2 | |
| Q.5 | (a) | Define: Ambiguous grammar. Also state example of same. | 03 | |
| | (b) | Explain and compare two variants of intermediate code. | 04 | |
| | (c) | Explain in brief the design of a macro assembler. | 07 | |
